

## CHANGING PLANES

The knotted and tangled problems of today - environmental, political, social, moral, ethical, economic and so forth - have several points in common. With so many of them :

- (1) There is no solution on the current plane of today's life.
- (2) The only real solution lies on a higher plane to which we have no access of our own.
- (3) Changing planes can only be done by following a guide who knows the way and can lead us over the bridge.
- (4) Only someone who has descended from a higher plane to a lower one and returned to the higher can create such a bridge for us to cross.
- (5) Only Jesus has descended from the highest heaven to the very lowest depths of hell and returned to the highest heaven again. He calls to us all, "Follow Me".
- (6) Those who have themselves crossed such a bridge can in turn guide others across it.
- (7) Christians call the higher planes "The Kingdom of God".
- (8) Within the Kingdom of God - where Christ reigns increasingly - even the most intractable problems have solutions.
- (9) To stay on the current plane where our problems are insoluble ends in death.
- (10) Changing planes is seldom without cost or pain; but not one thing in life is more worth doing.
